

# Science Fair Project Overview

Dear Parents,

Science Fair season is upon us, and I am getting the students organized to start their projects and prepare for the Jack Hulland Science Fair on Tuesday, March 9th.

Science Fair projects are a great learning opportunity for the students, but it requires organization, time management and independent work at home. A lot of students are able to handle that responsibility, and all students will require at least some support at school and at home. As a result, I would like to thank you in advance for helping to make the Science Fair a possibility, because without parental support, it wouldn't be a possibility.

To start the project, I am sending home this package with the following information:

Page 1: **Project Overview Sheet**

- ***Please sign this front page and return it to school.*** This indicates that you have received and reviewed the package with your child.

Page 2: **Science Fair Project Outline** (both sides)

- Describes the steps involved for the project, and the due dates. Keep this for your own records. ***Keep this outline at home.***

Page 3: **Project Calendar** (front side) **and Project Ideas** (back side)

- Keep the calendar of dates, and use some of the ideas on the back to help the students generate their own ideas and projects. ***Keep at home.***

Page 4: **Steps of the Scientific Method** (both sides)

- Describes the parts of an experiment, and describes on the back side what the final report and display should look like. ***Keep at home.***

Unfortunately, large school projects can cause a lot of stress for the students and families involved. Hopefully this package helps you and your child start off the project in an organized way, while minimizing the stress. I want the students to learn for their experiences and enjoy the process, especially the science.

If you have any questions regarding the project, please do not hesitate to contact me at school (667-8496), home (633-4442), or email at david.michayluk@yesnet.yk.ca
